

## CMHC: Student Learning Outcomes

KPI = Key Performance Indicator | SLO = Student Learning Outcome | I = Introduced | R = Reinforced | A = Applied

| Student Learning Outcomes   | Course    |
|---|-----------|
| KPI #9: Standard 5.C.1.b – Theories and Models Related to Clinical Mental Health Counseling   |           |
| SLO (I): Students will be able to identify which theoretical orientation they are most aligned with and be able to describe the degree to which the theory aligns with their view of human nature.  | 503       |
| SLO (R): Students will be able to identify key concepts, techniques, and key figures associated with the major counseling theories.   | 513       |
| SLO (A): Students will be able to implement a LifeStyle Assessment and defend choices according to Adlerian Psychology.   | 537       |
| KPI #10: Standard 5.C.2.d- Diagnostic process, including differential diagnosis and the use of current diagnostic classification systems, including the Diagnostic and Statistical Manual of Mental Disorders (DSM) and the International Classification of Diseases (ICD). |           |
| SLO (I): Students will be able to analyze a movie character and 1) provide a possible diagnosis (DSM-5 and ICD-10); 2) discuss possible modes of treatment, appropriate referral sources, and prevention strategies relevant to that diagnosis.                             | 504       |
| SLO (R): Students will apply the diagnostic process to a case scenario and provide a diagnosis based on evidence presented in case.   | 533       |
| SLO (A): Students will be able to create a case conceptualization for a client and verbally articulate evidence for diagnosis.  | Practicum |
| KPI #11: Standard 5.c.3.e- Strategies to advocate for persons with mental health issues   |           |
| SLO (I): Students will identify various approaches to advocating for clients with mental health diagnoses.  | 503       |
| SLO (R): Students will be able to select and defend strategies to advocate for persons of a cultural group different from their own, as well as summarize an integration of concepts from Adlerian Psychology.  | 523       |
| SLO (A): Students will integrate advocacy strategies into their multicultural view of client treatment in clinical mental health counseling.  | 604       |
